**SONAR and Levity Announce Strategic Integration
to Enhance Freight Market Intelligence**

SONAR

SONAR x Levity

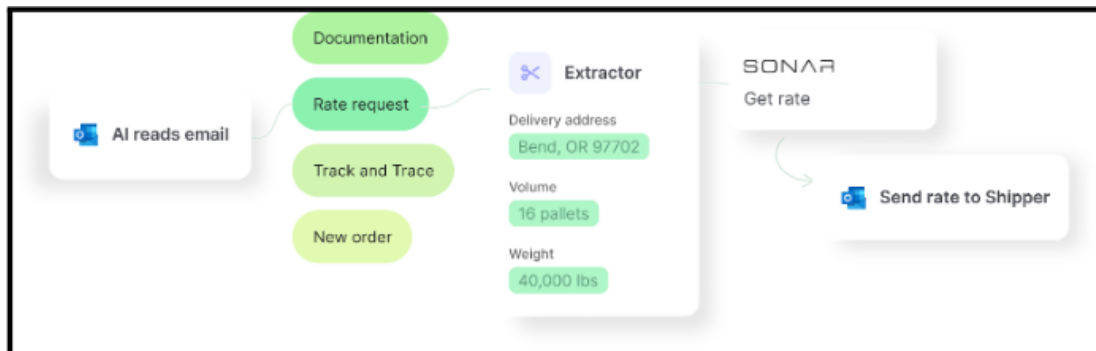

SONAR, a leader in freight market intelligence, and Levity, an AI-powered automation platform, are excited to announce an integration that brings SONAR’s powerful data capabilities into Levity’s workflow platform. This partnership gives Levity users high-frequency market insights, empowering them to make informed, data-driven decisions with greater confidence.

Through the integration, SONAR’s TRAC spot rates and SONAR lane scores will now be seamlessly incorporated into the Levity platform. These tools provide users with real-time visibility into freight pricing and market conditions, allowing them to optimize pricing strategies with precise and accurate data. With SONAR’s datasets integrated into Levity’s intelligent automation workflow, mutual customers can enhance their decision-making processes and streamline operations like never before.

“This integration between SONAR and Levity delivers a seamless way for mutual brokerage customers to access high-frequency market intelligence within their existing workflow. By combining our data-driven insights with Levity’s AI-powered automation, teams can respond to quotes quicker and with a higher degree of accuracy,” said Nick Persin, director of strategic partnerships at SONAR.

Levity’s AI-driven platform enables businesses to automate workflows with ease. By integrating SONAR’s trusted market intelligence, Levity further strengthens its ability to support logistics and supply chain professionals with unparalleled efficiency and insights.

“Logistics teams are constantly under pressure to move faster and operate more efficiently, yet they’re still burdened by manual, repetitive tasks. At Levity, we believe AI should work for the team, not the other way around. By integrating SONAR’s real-time market data into our AI-powered automation, brokers and 3PLs can eliminate inefficiencies, reduce manual workloads and focus on what truly moves their business forward,” said Gero Keil, CEO and co-founder of Levity.

This collaboration underscores both companies’ commitment to innovation and delivering superior solutions to the logistics industry. By combining SONAR’s robust data analytics with Levity’s intelligent automation, this integration sets a new standard for real-time freight intelligence within AI-powered workflows.
